

SOCIOECONOMIC COMMITTEE (FORMERLY COMMUNITY CONTRIBUTIONS AND PROCUREMENT COMMITTEE)

Canada Nickel Company —Crawford Nickel-Cobalt Sulphide Project

6th MEETING REPORT

MEETING INFORMATION		
DATE	October 24 th , 2023	
TIME	10:00 AM to 11:30 AM	
LOCATION	Videoconference—MICROSOFT TEAMS	
PARTICIPANTS	Members	Presence
	Richard Charlebois, Town of Iroquois Falls	
	Michelle Boileau, City of Timmins	✓
	Patrick Roberts, Town of Smooth Rock Falls	✓
	Shannon Michaud, Town of Smooth Rock Falls	
	Shannon Piper, Town of Smooth Rock Falls	✓
	Mickayla Bird, Timmins Native Friendship Centre	✓
	Brenda Camirand, Timmins Economic Development Corporation	✓
	Blaire Westberry, Aboriginal People’s Alliance of Northern Ontario	✓
	Richard Vallee, Fire Department & Emergency Services Town of Cochrane	✓
	Vindra Sahadeo, Timmins District Multicultural Centre	✓
	Dr. Lianne Catton, Porcupine Health Unit	✓
	Laurie Dagg Labine, Porcupine Health Unit	✓
	Bill Greenway, Economic Development Centre Iroquois Falls	✓
Phil Archambault, Timmins Chamber of Commerce & Fountain Tire Timmins		
CANADA NICKEL	<ul style="list-style-type: none"> ✓ Mathieu Boucher, Environmental Manager ✓ Gabriella Desmarais-Brunet, Community Relations & Communications Coordinator 	
FACILITATION	<ul style="list-style-type: none"> ✓ Isaac Gauthier – Facilitator – Transfer Environment and Society (TES) ✓ Stephanie Cotnoir – Note taker – Transfer Environment and Society (TES) 	
OBSERVERS	<ul style="list-style-type: none"> ✓ Hilary Janes, Socio-economic discipline lead, Stantec ✓ Joshua Barrett, Senior environmental planner, Stantec ✓ Loren Knopper, Senior principal, Stantec ✓ Ferenaz Raheem, Environmental Planner, Stantec 	
AGENDA	<ol style="list-style-type: none"> 1. Welcome and Roundtable 2. Meeting Agenda Review and Approval 3. Crawford Project Updates 	

MEETING INFORMATION

4. Discussion on social impacts and valued components
5. Contributions program updates
6. Next steps / Next meeting
7. Varia

MEETING HIGHLIGHTS

COMMITTEE SUGGESTIONS

- Documents/Sources of data to consider for socio-economic baseline information:
 - The 2021 population health status report for the regional Public Health Unit
 - A research report prepared by the Northern Policy Institute on homelessness, substance use and mental health in Northern Ontario
 - The updated Timmins homelessness prevention plan
- Include racism among the social determinants of health. Language and race should also be included more explicitly as important social determinants of health.
- Language accessibility should be considered as an important factor when assessing access to community services and when trying to encourage socio-economic development and the retention of immigrants in the region.
- Mental health and homelessness should be considered and assessed together as they are often related.
- Canada Nickel should prioritize the use of the term 'substance-use' instead of 'addiction' when referring to social and health conditions as it is more inclusive.
- Combine regional immigration with workforce requirements to avoid using the word 'immigration' when referring to social and economic components as it tends to refer to people from outside of the country region but should also consider people from other regions. There is also an overall need for better retention of workers.

COMMITTEE CONCERNS

- Housing is a high priority valued component and needs to be addressed cautiously considering the potential risks of further homelessness. The increased presence of workers in the region could have a significant impact on access to housing and accommodation services.
- Workforce requirements is a high priority valued component. There are insufficient workers in the region and attracting new workers is difficult due to winter weather and other factors.
- Accessible healthcare and social services are a high priority valued component. Currently, there is a lack of capacity in all communities and there aren't enough primary care physicians to meet existing needs. This issue should also be considered in relation to highway accessibility, as physicians tend to drive in, and how the project may potentially impact transportation and road infrastructure, with respect to emergency response services.

1. WELCOME AND ROUNDTABLE

Isaac Gauthier, the meeting facilitator, initiates the meeting and welcomes the members.

Gabriella Desmarais-Brunet shares a few words of welcome to the members. She adds that Canada Nickel has invited new members to the committee, to better reflect the main impacted communities and the scope of project impacts. Additionally, experts from Stantec are also present at the meeting to share their upcoming work regarding the Crawford Project's social and economic studies.

Mr. Gauthier invites all the members to introduce themselves in a committee roundtable.

2. MEETING AGENDA REVIEW AND APPROVAL

Mr. Gauthier presents the meeting's agenda. The agenda is approved.

3. CRAWFORD PROJECT UPDATES

Miss. Desmarais-Brunet presents the Crawford Project updates and highlights.

Canada Nickel submitted its Notice of Project Status to bring the Crawford Project into Advanced Exploration while continuing to engage with local First Nation and Metis communities. Engagement with First Nations for the bulk sampling activity has been ongoing with the assistance of Blue Heron.

Crawford's advanced exploration project involves collecting a bulk sample of 1 000 tonnes to demonstrate recovery rates and grades at pilot scale. The preferred window to perform this activity would be winter 2024 and is expected to last 5 months (January to June). The bulk sampling is also an opportunity to increase knowledge and gain experience (i.e., handling of overburden material, water management) and to reduce project risks.

CNC also published last September their first ESG report for 2022 which identifies CNC's priority areas, namely Communities, Our People, Environment and Governance. [The full report is available online.](#)

The ESG Report also highlights CNC commitment to responsible business practices and sustainable development based on the United Nations Sustainable Development Goals and the UN Global Compact.

Finally, CNC released their Feasibility Study on October 12th, 2023 - highlighting the project's economic potential and expected production over the estimated 41 years of the mine's life. The final results will be shared once the full report is published.

No questions or comments are raised.

4. REVIEW OF IMPACT ASSESSMENT PROCESS AND SOCIO-ECONOMIC COMMITTEE

Miss. Desmarais-Brunet reiterates the role and purpose of the Socio-Economic Committee as a key engagement mechanism for Canada Nickel's project as it undergoes the Impact Assessment Process.

The committee will thus have the opportunity to review and comment socio-economic study results as part of the IA process and to share their knowledge and perceptions on these topics in their capacity as community experts. The committee is a venue for authentic and transparent discussions.

Following suggestions and comments shared at the previous Socio-Economic committee meeting in April, additional organizations have been reached out to and invited to participate in the committee. New members include representatives from:

1. Timmins Native Friendship Centre

2. Aboriginal People's Alliance of Northern Ontario
3. Timmins Multicultural Centre
4. Iroquois Falls Economic Development Centre
5. Timmins Chamber of Commerce

No questions or comments are raised.

5. STANTEC INTRODUCTION – VALUED COMPONENTS (SOCIAL, ECONOMIC & HEALTH)

Hilary Janes, socio-economic discipline lead at Stantec for the Crawford Project, presents the scope of the work the firm will be conducting, per the federal guidelines for Impact Statement. She also shares the type of data and information that will be collected to document baseline conditions and assess effects on valued components.

Mrs. Janes will oversee social conditions, while her colleagues Joshua Barrett and Loren Knopper will respectively oversee economic conditions and health conditions. She further explains the baseline data that will be collected to describe existing conditions and to assess project effects (for more details, please refer to slides 11 to 16 of the presentation in Appendix I). The following is an overview:

Social conditions

Social conditions include the main valued components of Infrastructure and Services as well as Land and Resource Use. Baseline data is collected for various aspects to describe the capacity of existing infrastructure and services and current conditions of non-traditional land use, for example accommodations and lodging, transportation infrastructure, property ownership, access to recreational areas, etc.

Economic conditions

The federal guidelines require that effects be assessed for three areas: economy, employment, and business. This relies on baseline data being collected, disaggregated, and used as inputs into an economic model to help understand the project's direct and indirect economic impacts.

Health conditions

Two types of assessments are performed with respect to health conditions. The human health risk assessment (HHRA) focuses on biophysical determinants of health (ex: exposure to contaminants) whereas the health impact assessment (HIA) focuses on biophysical and social determinants of health in a more holistic way. Effects on health and well-being in the HIA are assessed based on how the project's different phases (i.e., construction, operation, closure) could impact health conditions in communities.

Indigenous People

Specific to Indigenous People, baseline data will be collected on a variety of topics and will include all previously mentioned conditions that are specific to Indigenous communities to assess the project's effects.

Miss Desmarais-Brunet shares an overview of the reports that have been so far provided to Stantec to feed the collection of baseline data. She invites members to share any data or reports they notice may be missing.

Mr. Gauthier also invites members to ask questions or share comments on the content presented so far. He also invites members to share any additional information or data sources that may be of assistance to the baseline studies.

QUESTIONS AND INTERVENTIONS	ANSWERS
Q & I 1	<p>A member shares that the 2021 population health status report for the region is available online or as a hard copy if needed. The report includes readily available data.</p> <p>Miss Desmarais-Brunet thanks the member for mentioning and sharing these documents.</p>
Q & I 2	<p>A member asks whether racism is considered in the social determinants of health. The member explains that in Northern Ontario there are tensions between immigrant and non-immigrant community members. Immigrant experiences are often either invisible to their white colleagues or are dismissed and trivialized, which can have a negative impact on an individual's physical and mental health. Also, to encourage retention of immigrants in the region and socio-economic development in communities, providing services in different languages, other than English and French, is important to consider in terms of obstacles to accessible community services.</p> <p>They also remark that data with respect to race is rarely collected and documented by institutions. This usually needs to be collected based on lived experiences.</p> <p>Mrs. Janes responds that the scope of the Impact Statement and research topic is established based on the federal's Tailored Impact Statement guidelines. Racism wasn't explicitly included in these guidelines but is usually considered in the GBA+ process.</p> <p>Mrs. Janes acknowledges the member's comment and explains that data will be collected from various desktop sources, including Statistics Canada, but adds that they are also happy to collect information and personal experiences from committee members and keep communications open to help address expressed concerns.</p>
Q & I 3	<p>A member shares their support with regard to the previous comment. They mention that language and ethnicity are important social determinants of health and should be explicitly included.</p> <p>Mrs. Janes reassures the members that when Stantec will collect baseline information and assess potential effects, they will ensure to include data on racism and spoken languages.</p>
Q & I 4	<p>A member highlights a recent research report prepared by the Northern Policy Institute on Northern Ontario's homelessness, substance use and mental health crisis, as well as the publication of an updated homelessness</p> <p>Miss Desmarais-Brunet thanks the member for sharing these documents.</p>

QUESTIONS AND INTERVENTIONS		ANSWERS
	prevention plan for Timmins. They will share the report and plan with Canada Nickel by email.	
Q & I 5	A member mentions that the Timmins Diversity Report was not prepared by the Timmins Multicultural Centre, contrary to what is mentioned in the presentation. If the report was found on the Center’s website, it was probably prepared by someone else.	Miss Desmarais-Brunet thanks the member for the observation and will make sure to verify the author of the document.

6. DISCUSSION ON SOCIAL IMPACTS AND VALUED COMPONENTS

Mr. Gauthier invites the committee members to revisit a discussion that was held at the last meeting in April 2023 where preliminary valued components to be considered in the Impact Assessment were presented and their respective level of priority was discussed by the members. As a note, the following is the definition that was used to describe valued components:

“Valued components consist of elements that are of particular concern or value (i.e.: local and regional infrastructure, land and resource use, greenhouse gases, river systems, etc.).”

They are used:

- In the Impact Statement: They help the proponent and the Agency tailor the Impact Statement guidelines with regard to how the Crawford Project will impact communities and groups.
- Within the Committee: The valued components will be useful in identifying specific impacts to work on and help the committee in its efforts to identify meaningful solutions to these impacts.
- Canada Nickel's intentions towards the public: Activities to be held in coming months will provide opportunities to further discuss valued components with community members.

By revisiting the valued components, Mr. Gauthier aims to confirm their respective level of priority and to see if some valued components are missing or if they can be defined differently, especially in light of the several new members. High priority VCs will form the basis of the upcoming committee meetings in which initial results and potential effects with respect to the mine’s activities will be presented and discussed for committee feedback and to explore specific mitigation measures.

QUESTIONS AND INTERVENTIONS		ANSWERS
Q & I 1	Looking at the bullet points, a member asks if it would be relevant to include a bullet on inclusive spaces.	Mr. Gauthier thanks the member for the comment and suggests this could be considered as part of the social conditions.

QUESTIONS AND INTERVENTIONS		ANSWERS
Q & I 2	A member asks how many people voted last time and whether they were asked to add ideas.	Mr. Gauthier responds that he does not recall the exact number of participants but explains that the initial purpose of the activity was to encourage discussion on preliminary valued components and whether any were missing.
Q & I 3	A member asks if a definition or further context could be provided for each component.	Mr. Gauthier proceeds to provide a general overview of each component identified in the figures.
Q & I 4	A member comments that the use of the word 'immigration' tends to refer to people from outside of the region. They suggest combining regional immigration with workforce requirements to avoid using the word 'immigration' as generally there is also an overall need for better retention of workers.	Mr. Barrett confirms they don't usually use the word 'immigration' within assessments of workforce requirements and impacts. If considered in effects assessments, they would usually frame it as sources of labour from outside of Canada.
Q & I 5	A member shares that the Impact Assessment for the Greenstone Mine's relocation and reconstruction of Highway 11 near Geraldton, Ontario may be of value to this project and could help alleviate concerns regarding the project's traffic impacts, especially regarding the new 230 kilovolt transmission line connecting the Porcupine substation in Timmins with a planned switching station to be built 42 km north of Timmins. They mention that a notice of commencement and public information session was announced for the project, which is led by Taykwa Tagamou Nation (TTN) and Transmission Infrastructure Partnerships Limited (TIP). The project will supply power for the Crawford Project.	Miss Desmarais-Brunet thanks the member for the comment and information. She confirms that the transmission line is a TTN project. CNC is not part of the project but will support it.
Q & I 6	Mr. Gauthier asks if the Housing is still a high priority valued component.	Members respond and confirm in the chat that housing is still of great importance.

QUESTIONS AND INTERVENTIONS		ANSWERS
		<p>A member explains that mental health and homelessness are often related as individuals with mental health issues are generally more vulnerable and at risk of losing their access to housing.</p> <p>A member explains that housing needs to be addressed cautiously considering the potential risks of further homelessness. The increased presence of mine workers in the region could have a significant impact on housing development and access, and accommodation services.</p>
Q & I 7	Mr. Gauthier asks if workforce requirements are also still of high priority.	Members respond and confirm in the chat that workforce requirements are still of importance. They further explain that there aren't enough workers in the region and attracting new workers is difficult due to winter weather and other factors.
Q & I 8	A member suggests using the term 'substance-use' instead of 'addiction' as it is more inclusive of different contexts and variations.	Mr. Gauthier and Miss Desmarais-Brunet thank the member for the comment and mention that the terminology will be changed.
Q & I 9	A member explains that accessible healthcare and social services are also important to consider. Even currently, services are unable to meet the needs of communities. There is a lack of primary care physicians which also needs to be considered when assessing highway accessibility, as physicians tend to drive up from regions further south. Impacts on transportation and road infrastructure are important for emergency response services.	Miss Desmarais-Brunet and Mr. Gauthier thank the member for their observations and confirm they will be considered.
Q & I 10	A member invites proponents to consider their role in preventing poor health outcomes. They suggest there may be opportunities to identify, through the built environment and	Miss Desmarais-Brunet and Mr. Gauthier thank the member for their observation and confirm this will be considered.

QUESTIONS AND INTERVENTIONS		ANSWERS
	access to recreation, ways to encourage health and well-being.	
Q & I 11	A member asks in the chat if CDSSAB is a member of the socio-economic committee	Miss Desmarais-Brunet confirms that they are but were unable to attend the current meeting.

7. CONTRIBUTIONS PROGRAM UPDATES

Mr. Gauthier reiterates for the new committee members that the committee’s initial mandate was to co-construct Canada Nickel’s Local Procurement Policy & Community Contribution Program, both available online.

Miss Desmarais-Brunet presents the results for the first year’s contribution and legacy program applications. The results are presented per community and focused mostly on health and well-being.

Miss Desmarais-Brunet asks for input from the members to help advertise the existence of the short-term and legacy contribution programs. Even if CNC is a junior mining company, the company aims to help address community issues with the contribution programs and to move the needle on important issues and topics.

An overview of applications to the legacy contribution program is presented. Applications were reviewed by CNC senior management and with TES’ support. This year’s legacy contribution has been awarded to the Timmins and District Hospital Foundation to assist in the upgrade of medical equipment in the emergency department. The project has been granted a funding of \$100 000.

Miss Desmarais-Brunet invites the members to reach out to her if they have or know of a potential project that could apply to Canada Nickel’s contribution program. She also remains available to answer any questions on the criteria and scope of the legacy program.

QUESTIONS AND INTERVENTIONS		ANSWERS
Q & I 12	A member asks about the frequency of the contribution program and application deadlines.	Miss Desmarais-Brunet confirms the contribution program is run quarterly. The next deadline is November 30 th for programs starting in January 2024. And then the next deadline would be March 30 th .

8. NEXT STEPS / NEXT MEETING

Mr. Gauthier invites the members to reach out to Miss Desmarais-Brunet for any further comments or questions they may have. The next meeting will take place in 2024, at a date to be determined.

9. VARIA

Mr. Gauthier and Miss Desmarais-Brunet thank the members for their participation.

The meeting ends at 11:30 AM.

APPENDIX I PRESENTATION

CANADA NICKEL
COMPANY

Socio-Economic Committee Meeting
October 24th, 2023

Agenda

Project Updates

Review of Impact Assessment Process and Socio-Economic Committee

Stantec Introduction - Valued Components: Social, Economic & Health Conditions

Discussion on Previously Identified High-Priority Valued Components

Contribution Programs

a) Community

b) Legacy

U P D A T E

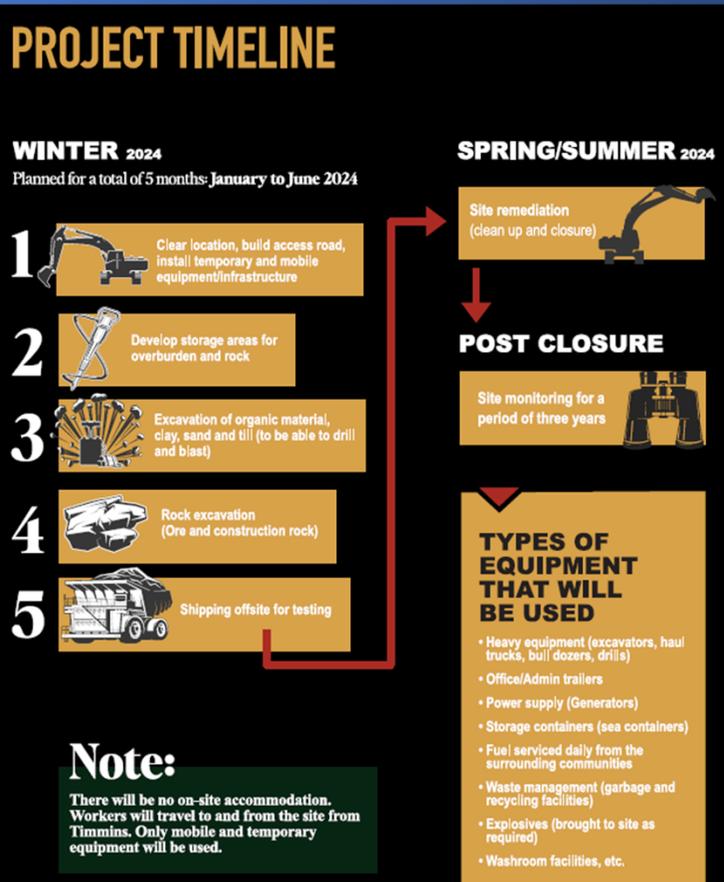

Notice of Project Status

Canada Nickel Company has submitted a Notice of Project Status to bring the Crawford Project into ***Advanced Exploration***.

Canada Nickel Company plans and commitments to engagement with local First Nation and Metis communities, appropriate government representatives, and the public.

Canada Nickel Company will continue engagement and respond to concerns raised regarding potential impacts on Aboriginal and treaty rights and the potential mitigation of these concerns.

Bulk Sample

Main Objective:

Increase knowledge/Reduce the risks associated with the Crawford Nickel Project

Specific Objectives:

- Collect bulk sample (1000 tonnes) that will be shipped offsite to third party's facility
- Demonstrate recovery rates and grades at a pilot scale
- Gain experience with overburden material handling (clay and others)
- Increase knowledge and document water management

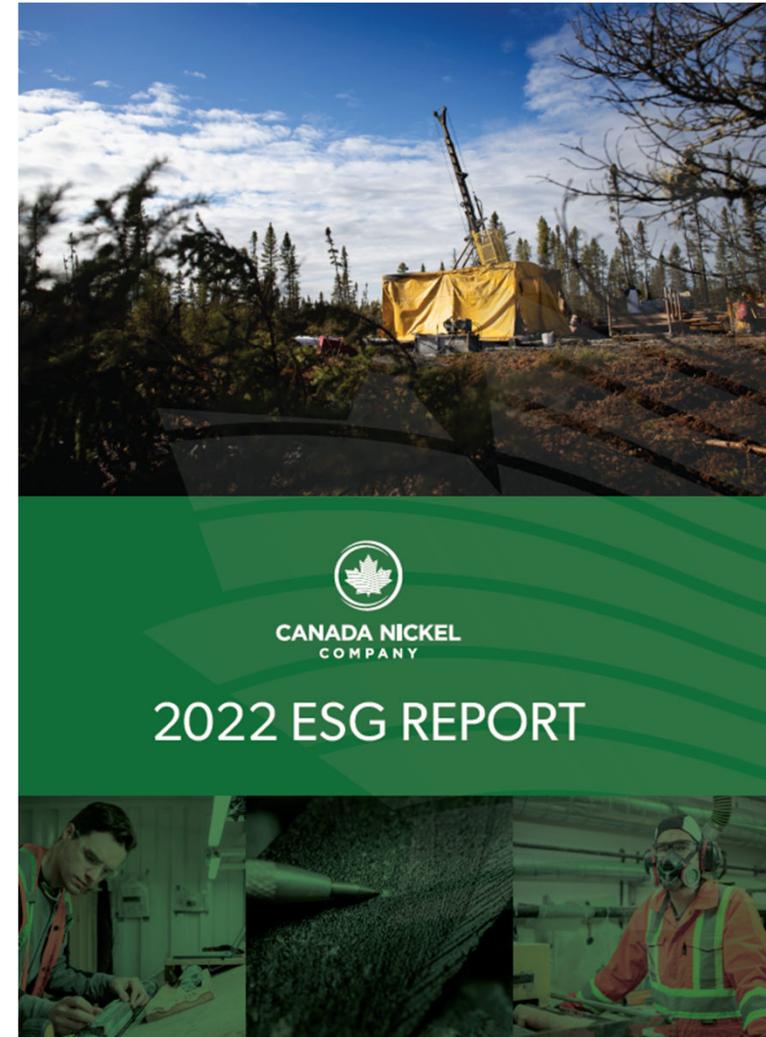

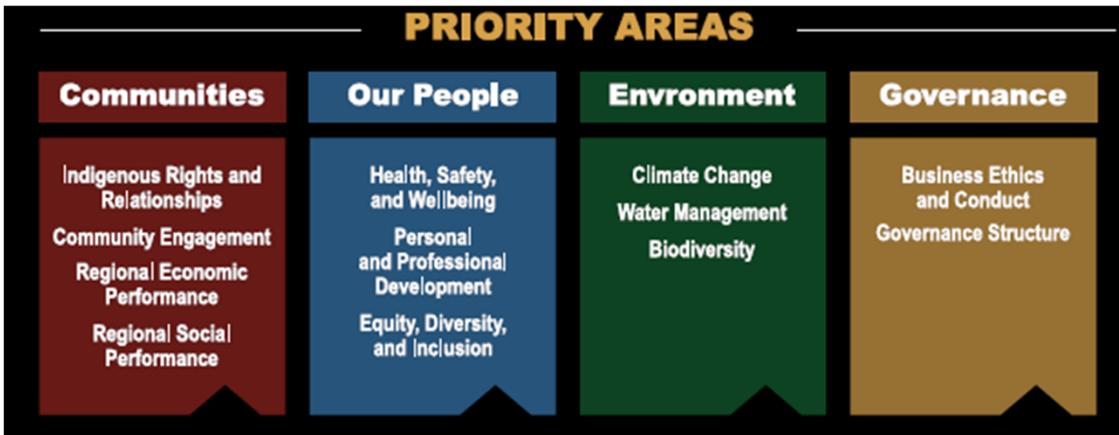

Preferred window to perform work : The Project is expected to take ~5 months between January to March 2024 – frozen ground. If possible Bulk Sample work would begin earlier.

For Anglo American, as part of our agreement announced in January 2023, to assess opportunities to add value to Crawford from its FutureSmart Mining™ technology program.

ESG Report

- September 2023 Published first Environmental, Social, and Governance (ESG) report in early September 2023.
- Based on the Global Reporting Initiative (GRI) standards.
- Contributions to the United Nations Sustainable Development Goals (UNSDGs) and commitment to the United Nations Global Compact (UNGC).

United Nations Sustainable Development Goals/ Global Compact

SUSTAINABLE DEVELOPMENT GOALS

1. The Sustainable Development Goals also known as the Global Goals, are a universal call to action to

- end poverty, protect the planet, and ensure that by 2030 all people enjoy peace and prosperity.

Development must balance social, economic, and environmental sustainability.

2. The principles of the UN Global Compact are as follows:

1. Human Rights
2. Labour
3. Environment
4. Anti-Corruption

These principles represent a commitment to responsible business practices and sustainable development.

Feasibility Study Release

This feasibility study is a significant milestone for Crawford and a major step forward in demonstrating the value of our Timmins Nickel District and its potential to anchor a Zero Carbon Industrial Cluster in the Timmins-Cochrane region. Crawford is poised to be a leader in the energy transition through the large-scale production of critical minerals, including nickel and cobalt, and to become the sole North American producer of chromium, while also supporting Canada's climate objectives through industrial-scale carbon capture and storage. - Mark Selby

Canada Nickel's Feasibility Study confirms the Crawford Project's strong economic potential for the company, the region and the country. Discounting CNC's other regional properties, Crawford is one of the world's 2nd largest nickel reserves and resources.

The initial mineral reserve is
1.7
billion tonnes of ore
at a nickel grading of
0.22 %

Over the estimated 41-years of mine life, Canada Nickel expects to produce:

The study also outlines an internal rate of return
of 17.1%
which would increase to 18.3%
with projected carbon capture and storage tax credits.

The company also expects an annual
EBITDA
(earnings before interest, taxes, depreciation and amortization)
of
\$811 million
USD

1.6 million
TONNES OF NICKEL

490,000 OUNCES OF
palladium & platinum

24,000
tonnes of cobalt

58 million
TONNES OF IRON

2.8
MILLION TONNES
of chromium

Additionally, Crawford will be a net negative contributor to global CO₂ emissions, meaning that the site will capture and store more carbon than it emits, even after accounting for the project's footprint. Thus, Crawford will be Canada's largest carbon storage facility, with a projected **1.5 million tonnes per year of carbon captured and stored at the site** during the mine's peak 27-year period of production.

Socio-
Economic
Committee

Socio Economic Committee

- Advisory Committee to assist in identifying local socio-economic impacts from the Crawford Project thus assisting with the Impact Assessment Process.
- The committee would review and comment on consultant reports, identify potential gaps through a local lens, and ultimately support mitigation measures.
- Canada Nickel Company values authentic and transparent communications and appreciates the time and efforts given by the socio-economic committee.

Canada Nickel Company sent out invitations to the ***Socio-Economic Committee*** to the following as per committee guidance and received new members from:

1. Timmins Native Friendship Centre
2. Aboriginal People's Alliance of Northern Ontario
3. Timmins Multicultural Centre
4. Iroquois Falls Economic Development Centre
5. Timmins Chamber of Commerce

Impact Assessment Process

The **Impact Assessment** is a planning and decision-making tool used by regulators, communities, stakeholders, Indigenous groups, and proponents to assess the positive and negative impacts of a project.

PURPOSE

To foster sustainability through a fair, predictable, and efficient process that encourages awareness and trust through meaningful public and Indigenous engagement.

Throughout the Impact Assessment process, in support of this purpose, Canada Nickel is committed to:

- Conducting early, ongoing, and proactive engagement that is tailored to the community's interests and expectations
- Taking project decisions per stakeholder and Indigenous feedback obtained from a plurality of perspectives within the communities, including with groups that are not often involved in major project review processes.
- Sharing public, nuanced, and summarized project information that transparently addresses issues, concerns, opportunities, and solutions

The background of the slide features a dark blue horizontal band at the top. On the right side of this band, there is a large, semi-transparent light blue circle. The rest of the band is a solid dark blue color.

Stantec

Valued Components

- Socio-economic valued components
 - Social Conditions
 - Economic Conditions
- Other connected valued components
 - Health Conditions
 - Indigenous Peoples
- Interconnection between four socio-economic valued components (i.e., income inequality)
- For socio-economic VCs, baseline data collection will rely on secondary research, some primary research (emails, phone calls to local authorities and municipal staff), and results of engagement/consultation.
- Data will be disaggregated where possible to inform GBA+/potential effects on diverse groups.
- The effects assessment will consider opportunities to enhance benefits to communities.

Social Conditions

- Infrastructure and Services
 - Baseline data will be collected to describe the capacity of existing infrastructure and services in local communities
 - accommodation and lodging (e.g., affordability, availability, suitability)
 - road infrastructure and traffic safety
 - railways
 - emergency services (e.g., firefighters, police, ambulances)
 - educational services and facilities
 - health and social services (childcare services, women's shelters, elder care, and addiction and mental health-related services)
 - Effects assessment to rely on baseline information to assess effects on infrastructure and services
- Land and Resource Use
 - Baseline data will be collected to describe current (non-traditional) use of land and resources
 - property ownership (Crown land, private land) and permanent or seasonal residences/cabins
 - parks and recreation areas, trails, canoe routes, and tourism
 - conservation area lands, wildlife management areas or other ecological reserves
 - industrial and commercial areas and agricultural areas
 - mining claims and aggregates
 - administered commercial forest areas (including forests under agreement and areas designated for timber sales)
 - registered or recognized hunting, trapping or guiding areas, recreational and commercial fishing areas
 - Effects assessment will assess potential effects on land resources and land use planning

Economic Conditions

Baseline data will be collected to describe local and regional economic conditions:

- demographic information
 - economic activities in the region
 - existing employment and unemployment rates, education levels
 - local, provincial, or federal economic development plans or funding programs for the area
 - workforce, including the availability of skilled and unskilled workers, wages and average salary range, full-time and part-time employment and training and gender gaps such as for skilled trades and in wages and qualifications
 - a qualitative summary of conditions that influence workforce availability in the study areas over the short- and long-term and anticipated availability for the proposed project timelines
- Effects assessment will include the development of an economic model to determine potential effects on economy, employment and business (i.e., gross domestic product, job creation, induced benefits through domestic supply chain).

Health Conditions

- Human Health
 - Human health risk assessment (HHRA) - focus will be on biophysical determinants of health
 - Health impact assessment (HIA) - focus will be on biophysical and social determinants of health
- Social Health/Community Well-being
 - Baseline data will be collected to support the development of baseline health profiles, which need to reflect the overall health of each community
 - Social determinants of health approach
 - Development of community health profiles:
 - rates of sexually transmitted infections
 - injuries and chronic disease
 - rates of gender-based violence
 - mental health status and addictions
 - health related behaviours
 - access to health care and social services
 - community cohesion
 - Data will be used in the HIA to evaluate the social determinants of health in these areas and assess effects on well-being

Indigenous People

- Stantec Indigenous Services team members will be assessing effects on Indigenous Peoples.
- Baseline data will be collected to describe a variety of topics for Indigenous communities, including health, social and economic conditions.

Reports Provided to Stantec

Community Reports

- Timmins and District Hospital Safe Health Site Monthly Stats
- Ontario Works/ Housing/ Childcare & Paramedic Information

Discussion:

Review of previous high-priority valued components

What level of importance does your community or organization give to each valued component?

Canada Nickel Company Contribution Update

COMMUNITY CONTRIBUTIONS PROGRAM

JUNE 1ST TO SEPTEMBER 30TH 2023

Cochrane Curling Club

The Curling Club Facility was requesting funds to update infrastructure. Used for children's programming, seniors programming, weekly socials for newcomers and agricultural fairs.

Rock on the River

TFEC was established in 2015 by a group of passionate community members with the goal of improving the quality of life of residents in Timmins and the surrounding communities by facilitating high-quality arts and entertainment-based events.

Timmins Youth Wellness Hub

The Timmins Youth Wellness Hub acts from a diverse and equity seeking point of view. TYWH aims to cultivate a safe and welcoming community and encourage and support participation from youth in marginalized communities between the ages of 12-25 years.

Porcupine Music Festival

Porcupine Music Festival de Musique, are committed to the promotion of musical excellence at the amateur level through the provision of professional adjudication, collaboration with local music teachers, and the awarding of scholarships and plaques to deserving participants."

CANADA NICKEL
COMPANY

COMMUNITY CONTRIBUTIONS PROGRAM

OCTOBER 1ST TO DECEMBER 31ST 2023

Anti Hunger Coalition

The Anti Hunger Coalition is requesting funding for their Indigenous Cookbook Project. This cookbook with traditional Indigenous recipes will be provided to over 17 agencies across the Cochrane District.

NEOFACS

North Eastern Ontario Family & Children Services was requesting funding to update the Youth Mental Health Clinical rooms in the Smooth Rock Falls, Iroquois Falls and Cochrane Locations.

Sports for Kids/Kids Sport

Sports for Kids was requesting a donation to help sponsor children in the community with their extra curricular activities.

Rock and Gold Gymnastics Club

Rock and Gold Gymnastics Club is looking at hosting the first Ontario Gymnastics Competition in the Cochrane District. They were requesting sponsorship to be able to provide this opportunity to local district gymnastics teams as well as an opportunity for local district families to experience a provincial competition locally.

Contributions Per Community

Amount Awarded By Sector			
Health/Wellbeing	\$	26,000.00	
Education	\$	5,000.00	
Social	\$	11,000.00	
Environmental	\$	1,500.00	
Economic	\$	5,200.00	
Amount Awarded by Primary Community		Overall	Per Capita
Timmins	\$	34,200.00	\$ 0.82
Cochrane	\$	9,000.00	\$ 1.69
Iroquois Falls	\$	2,000.00	\$ 0.44
Smooth Rock Falls	\$	3,500.00	\$ 2.63
Other	\$	-	

Legacy Contribution Overview

Legacy Contributions applications are suitable to those Programs with requests greater than five-thousand Canadian dollars (CAD\$5,000) whose impacts, duration, or completion may extend multiple years, and which have significant implications relating to realized benefit or outcome.

2023 Legacy Applicants

Anti Hunger Coalition : Indigenous Cookbook (advised to apply for Community Contribution Funding)

Costello Community Fund : Roofing

MIC's Healthcare Foundation : 96 long term care facility in Iroquois Falls

NEONET: Inov8te Youth Technology Program

Timmins Economic Development Corporation: Physician Recruitment Bursary Program

Timmins and District Hospital Foundation: Emergency Department Reimagining Health Care- \$100,000.
